Doctrines of Men Resolved

Who Changed the Calendar in Israel? And When? RESOLVED Doctrines of Men Exposed

Feb 17, 2022

Length: 27 Minutes 38 seconds

How did we come to be taught that the moon begins the day in the Bible when it never does? How can a calendar called Hebrew have no Hebrew roots whatsoever and vets as Babylonian? It is time to expose just exactly who changed the Biblical Calendar and when. This is good! Yah Bless

Transcript:

Okay. Who done it? Who changed the calendar in Israel? We can follow Israel into captivity into Babylon but we do not find them keeping those calendars but maintaining their own afterwards. In fact, the Babylonian month, Nisan, the first month equated to Abib, basically, and replaced on the modern so-called Hebrew calendar in fraud today, is only used in scripture to refer to the reign of kings of Persia after Babylon and that is appropriate there. It does not, however, change the Bible calendar nor did it. Torah sets that as Moses called the first month Abib not Nisan which is Babylonian nonsense and anyone using Nisan really truly is not following the Bible. The Babylonian practice is what they follow.

The prophet Ezra is very clear. They restored the Bible and its calendar. Yes, the Bible comes with a calendar folks. It's Sabbaths -- that's every seventh day period -- and feasts, etc.

In antiquity Yahuah established the first and oldest calendar really at creation. Yes, it matters to Him. He created the time keeper -- the sun. Yeah. The moon and the stars have purposes and functions, indeed. There's no doubting that. They are for signs and seasons, as well. They have their functions, However the measure -- the great sign for days, Sabbaths, weeks, months, years Sabbaths and years and jubilees and even seasons -- well, these start for all of these on the sun as the measure, not the moon. Yes, there are a couple of feasts driven by the moon because they are evening events but we even prove their timelines

out in two videos in our Sabbath Series Parts 1 and 2. It's actually Answers in Sabbath Parts 1 and 2. One on the unleavening -- the seven days of unleavened bread. The other one on the Day of Atonement. So basically they both identify the day switching at sunrise. Period. Done. Proven. The end. There's really nothing to discuss. And we keep getting messages from people, you know. They'll see one video within all of that and they'll say, "Oh, but you know, Leviticus 20 blah blah blah says..." and they'll quote "the Passover." Well, the Passover is not -- it doesn't start at the start of the day. It starts in the evening because that's when passover started. That's what the Bible says. It was not a daytime event. That's just fact. So to take that and say, Oh, well that just redefines the Holy Scripture." What? No, it doesn't. See, this is the Bible calendar. Does this matter to Yahuah? Let's see.

[On slide: Jubilees 6:30-32 And all the days of the commandment will be two and fifty weeks of days, and (these will make) the entire year complete. thus it is engraven and ordained on the heavenly tables. There is no neglecting (this commandment) for a single -year or from year to year. And command thou the children of Israel that they observe the years according to this reckoning - three hundred and sixty-four days, and (these) will constitute a complete year, and they will not disturb its time from its days and from its feasts; for everything will fall out in them according to their testimony, and they will not leave out any day nor distrub any feasts.]

Yahuah cared so much about His calendar, well, he had it engraved on the heavenly tablets which are still there, by the way, which writing Moses received and wrote Jubilees and Enoch also reviewed and wrote the Book of Enoch. There you go. 52 weeks in the year, 364 days. In the months are essentially 30 days each and, yes, they're 24-hour days. We will deal with that when we get to Enoch. There are some out there saying, "Oh, it's 18 hours." No, no, no, no, no. Enoch is charting the sun and the moon from the east gate to the west gate. You're missing the six hours that are the return which is a total of 24. So no, that does not ever work either. See, that's engraved on the heavenly tablets, not just some dude who chose a calendar one day or especially some Rabbi who can't get it right anyway. They never do. They're horribly off and they have to be by their own doctrine. Right? They're not allowed to teach you and anything. Enoch will agree. You will see. Coming soon.

If we change the calendar, we disrupt and profane His feasts and Sabbaths and, yes, they are still pertinent. They still matter because they never passed away. Watch our Feast Series where you'll find the feasts throughout the New Testament and the Sabbath throughout the New Testament and both throughout even all the way through Revelation. The Revelation hasn't quite happened yet, so how can any illiterate scholar say these are passed away? Of course, they haven't. They are corrupting every week of every year today, Folks. And really every day.

[On slide: Jubilees 6:35 - 36 For I know and from henceforth shall I declare it unto thee, and it is not of my own devising; for the book (lieth) written before me, and on the heavenly tables the division of days is ordained, lest they forget the feasts of the covenant and walk according to the feasts of the Gentiles after their error and after their ignorance. For there will be those who will assuredly make observations of the moon -- now (it) disturbeth the seasons and cometh in from year to year ten days too soon.]

But where did all of this come from? First by observing the moon instead of the sun as the measure. Jubilees, and you are about to see Enoch very soon --coming very soon -- rebuke the use of the moon as the measure of the start of the day, etc. The Bible does not use the moon as that measure. Yes, it does serve a purpose. But it is not for the start of the day, the week, the month, the year, the Sabbath of years, the jubilee or even the seasons. So okay, that's a lot. But again, it does have a purpose, of course.

Now we've, well, proven this even the word "month" inserted in fraud many times to change the calendar, you know is "moon" instead of "month." It should be "month" many of those times. And so people looking at and saying, "Oh, well, the new moon dry no the month does the new month does not the new moon and this is an extensive study that we probably will do a video on at some point. Yes, they even change the Bible. Imagine that! Yes, we've caught them many times -- the couple of feasts that start in the evening are evening driven events, not calendar changes nor could they be especially when the rest all begin at sunrise. I mean there's seven feasts, so we're talking two --sort of -- three that have an evening start and then, well, the others all start at sunrise. So how do we overlook, you know, the full picture? Well, that's pretty much what many are trained to do. We're trained to read in fragments. We're

trying to pull out this or that and not to see the full view in the full perspective. Moses called this "walking as the Gentiles after their error". That's what he said. This group who changed the Bible calendar are -- Gentiles, not Hebrews. And they don't know the language. They don't know the Bible. In fact, they're not even Hebrews at all. They are the Synagogue of Satan who say they are Yahudim, as the word "Jew" is fraud and never-- can't even be rendered in ancient Hebrew -- never should appear in Scripture -- but "and are not, but do lie." Revelation 2:9 and 3:9.

When the Greeks came they did not force Israel to drop their calendar. Watch "Who Defiled the Temple?"

We can find the exiled temple priests in Qumran, Bethabara, as we've well covered in our Original Canon Series, in the Introduction of most of our books -- continuing their temple practice, really, since the days of Ezra and the return of the lost tribes. They kept extensive calendars, by the way there and they're all based on the sun -- 364 days, 12 months, 30 day periods, basically, each with four intercalary days -- one day added at the end of each quarter, just as Jubilees and Enoch and really the whole of scripture have always said. This is not the lunar calendar. It cannot be. We are told its the Hebrew calendar which is illiterate. It's off 10 days every year. That's pretty bad. I mean to be off one day is one thing. The Roman calendar is off a day and a quarter every year but 10 days is ridiculous. That's not, basically you know, a Hebrew practice from a people that are not Hebrews. So what would you expect, right? It's certainly not the Bible. They don't represent it. They don't know Yahuah. They never have. They try to hide his name. They try to hide his doctrine. They don't know Him. They don't want to know Him.

We also find the New Testament especially Messiah's death and resurrection prove they continue to keep the Bible calendar. Watch Part 6 A through G of our Sabbath Series for complete evidence. It does not mean they did not learn the others but it was not until 165 B.C. that Israel was forced to use a lunar Babylonian calendar when the religious system was changed and replaced. A new one was installed. See, there is no separating the Bible from its calendar -- not the Bible practice from its calendar. No. When you identify this group, you know they are not and do not represent the Bible in the slightest. Yet it is this group who today keeps what is called the "Hebrew calendar". It ain't Hebrew, folks. It's Babylonian.

The imposter replacement Pharisees of the Temple and the Synagogue worship system which was all new at that time turned a blind eye to the Torah calendar of Jubilees and Enoch. They already changed the calendar for Israel at that point. But who did it?

Well, the Sons of Zadok, the legitimate temple priests were exiled around 165 B.C. by who? By the Pharisees and Hasmoneans. That's who replaced them and became the Temple priests and the and those basically in charge of the Temple as we see all the way to Messiah's time. They're there. They shouldn't be. They're illegal. They should not be there. Now this is why the Qumran local writings call them the Sons of Darkness, the wicked priests and many other not favorable names. We have a whole chart in some of our recent books, like Rest the Case for Sabbath and it is intense as well as Messiah. He did not have good words to say about these. Period. If you do, you don't represent the Bible. Let's just be honest. These Pharisees and Hasmoneans are Gentiles, not Hebrews. They came from Samaria from Odain which is in the territory of Dan, not Judea. They were not Hebrews. Again, we proved this out in "Psalm 83 War" in our "Answers in Second Esras" series, in Gog of Magog video. So this stuff is right there. It's actually not difficult to chart and map and track these folks. They practiced the Babylonian lunar calendar, another worship system, not Yahuah's ever. They attempted to infuse Him into theirs, but see? That doesn't work. He always rejects it.

The temple priests kept the Bible calendar based on the sun and so does the New Testament as we have well proven in our Sabbath Series Part 6 A through C and "Rest the Case for Sabbath" -- our latest book. Get it if you have not. if you haven't reviewed that case then, wow! are you in for a real revelation.

Joseph of Arimathaea, in Mark 15, however, though saved, was a prominent Pharisee who, as evening approached was still on the Pharisee Calendar not observing the Feast Sabbath of Unleavened Bread as of yet. See? He petitioned Herod for the body of Yahusha. He then went out and bought linens which would be breaking the Sabbath otherwise. It is something he wouldn't do. He's a very prominent Pharisee. If his Sabbath drew on as the Bible Sabbath still did according to the Bible because it started at sunrise not sunset, then he would have broken his Sabbath. He would not have done that, of course in Pharisee-land there is a blank period see during the day between passover

evening until they begin their false Sabbath at sundown. See? Because they changed the calendar. They have a half a day unaccounted for and they also end up extending the seven days of Unleavened Bread to more than seven. Well, that's kind of dumb when you think about it. Yet you know, we've all fallen for it for many years. This is that gray area of error which the Pharisee lunar calendar creates and they would exploit to crucify Messiah on Unleavened Bread's Sabbath -- the first day without appearing to break the feast yet they did. See? They actually did. They just didn't break their false feast because they celebrate at the wrong time.

He was also carrying out the wishes of the Pharisees (Joseph) who demanded Yahusha be in the tomb before sundown -- again, for their false Sabbath. They were adamant about that. They were very religious. There's no doubt about that. Righteous? No. Again, Joseph was an exception because he followed Messiah. He was saved by all accounts very likely. I mean it certainly appears so. So basically, their false Sabbath is already in play way back then. Which means they're not following the Bible calendar which we already know the temple priests said they didn't follow the calendar. Now then the Marys however (and this proves this) followed the Bible. Notice they observed, but did not participate. Why? Ahh, this is important:

Luke 23:54 through 54-56 begins with the exact paradigm of Joseph of Arimathaea, the Pharisee. That is the story here in this portion thus the context when he says it was the "Preparation" yet at the same time Luke says it was the Sabbath because the Sabbath drew on, meaning it was already in place. Now how can the Sabbath be drawing on? How can we be in the Sabbath and at the same time it be the day of preparation? The day of preparation is preparing for the Sabbath. Well, it can't be both at the same time. Those two are at odds with each other not because Luke was wrong. Oh no, Luke is preserving that there are two calendars at work here. Preparation day is the timing of Pharisees. That's what Joseph is following. Who have this blank period falsely for this feast Sabbath. Yet the true Bible Sabbath was already drawing on. There you are. It's right there in scripture. Since sunrise which he confirms when he tells us the Marys watched noted where the tomb was and then left and went back and observed -- finished the observance of the Sabbath. They were already celebrating, see, so they're following the Bible. Joseph was not. Yes, he was saved but he was still following the

Pharisee calendar. That is what you see here. And so did the Pharisees. I'll show you in a second.

Notice the Bible writers do keep the times pertinent to the people involved many times and it is appropriate to do so. Just, that's why the Babylonian Nisan we showed you in the very beginning is used but it's in context of the Persian Kings thus appropriate. It's their month. It's the Babylonian month but still they conquered Babylon at that point and that's where the Hebrews -- some of them -- still were -- especially Ezra who's writing at that time and would return later. But it doesn't change the Bible. Same here with the Pharisees whom Luke is really calling out if you read this in proper perspective.

[on slide:]

This is no surprise because the Pharisees had already identified this -- again, false blank period that doesn't actually exist. Not in the Bible-- between passover evening and the next evening when their false Sabbath would begin yet actually they were crucifying Messiah on the biblical Sabbath which started at sunrise. But see, they had already changed the calendar since about 165 B.C. Again, watch our Sabbath series Parts 6A through G and we vet that fully. Read "Rest the case for Sabbath". It's all there. The temple priests continued the Bible calendar as does the New Testament though it notes Pharisee times within but more so to expose this and that's exactly what Luke does. The Pharisees controlled the temple and the entire religious system at that point. They had synagogues, right? Well, how come there's no synagogues in the Old Testament? There are not because there were none till 165 B.C. How come there are no Pharisees mentioned in the Old Testament? Because they were not in Judea until 165 B.C. The party didn't exist in Judea. Oh, it existed in Samaria where they came from and if you read II Kings 17 originally those Pharisees were the lowest in the land which are not the poorest but the criminals. Think about that. So when they turned a blind eye to Torah's calendar, they kept a different one and this can be observed to this day. Okay, so who done it? The Pharisees, known as Rabbis, and the continuation of the Pharisees is Rabbinic Judaism which is never the religion or really relationship of the Bible because the Bible's not about religion -- but rebuked many, many times especially from the lips of Messiah, Himself. They are Gentiles following the Babylonian system of worship. They infused in Samaria with Yahuah except they don't call their god "Yahuah". They

don't pronounce Yahuah's name. YHWH disappears from them from their lips. Why? Because they call their god "Hashem," which in II Kings 17 is Ashima -- same god. He rejected that and he still does today and he always will. Today we call that Judaism and it is not the origin of the Bible. Again, watch the "Origin of the Word Jew" and "Psalm 83 War" and "Gog of Magog" and "Answers in II Esdras" where we really expose that fully.

So they are the opposite of the Bible practice. Period. And again, just read Mark 7 especially verse 9.

The so-called Hebrew calendar today is in fact the Babylonian lunar calendar -- condemned by Jubilees and Enoch as error. And it is error. It doesn't even work. It requires an adjustment of an entire month every so many years. I don't remember how many off the top of my head and, you know, so they have 13 months in one of the years. That's stupid. That is not scripture -- ever. There is not a single time that ever occurs biblically. So something they just made up yet again, changing the Bible. Now we follow the Roman calendar as well, of course. But we are told the Bible calendar is based on the moon from the so-called Jews (which is a fraud word that shouldn't exist in scripture). And they supposedly keep the Hebrew calendar. That's a lie. The sun is the measure and that remains. May we restore it. The temple priests called them out and identify them in 100 B.C. The Greeks nor Romans changed the calendar back then. It is the Pharisees and Hasmonians, the Sons of Darkness, the Wicked Priests, the Synagogue of Satan, and the Seed of Satan, mind you, or what we call modern Jews today who changed the calendar and they're still abiding by it. Not that they don't leaven that to they live in everything and there you have it.

We have over 380 videos on this channel -- one for every day of the year now many just as profound with some 50 or so in Tagalog for Filipinos and now six in Spanish to start. Don't forget to like and subscribe and click the bell for notifications of new uploads. Join our email list, as YouTube fails to notify often and we will notify you ourselves at thegodculture.com. Just fill in the pop-up. We also have alternative platforms for videos on Rumble, Utreon and Odyssey and our new podcast is also available for all of our videos, pretty much, as well. All links are in the description box. Friend us on Facebook at [thegodculture](https://www.facebook.com/thegodculture) space hyphen space original. If you prefer an alternative to facebook we

now have Parlor -- link below. We now have five books published internationally with number six coming very soon being read now in over 100 countries with our new release uh rest the 400 plus page case for Sabbath uh it's been out for a little over a month now we also have now launched Ophir Philippines coffee table book in the US, Canada, UK and many overseas markets on amazon. Many asked for that. It is available in hardcover or softcover over there. Additionally we launched the Book of Jubilees, the Torah Calendar with now color maps and interior many requested that as well overseas because it was only black and white before. We still have the black and white available for a lower price point and we already have color in the Philippines but that too is available in hardcover or soft cover on Amazon overseas if you wish and the Book of Enoch coming soon. All books including Solomon's Treasure now are free in ebook just go to OphirInstitute.com for all the links for your area for all of our books. Thank you for watching. Now always remember "prove all things for yourself." God bless to everyone.
